

ANSHUMAN SAMANTA

Durgapur, India | +91 7047547258 | itisanshu@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Data Analyst skilled in T-SQL, Power BI modeling, and Python (Pandas/NumPy). Experienced in developing end-to-end analytics pipelines, relational schemas, and executive dashboards tracking sales velocity and customer churn.

Technical Skills

Databases & Core Analytics: SQL (T-SQL, Oracle SQL, PostgreSQL), Relational Database Management (RDBMS), Data Modeling, Data Normalization

BI & Reporting Tools: Microsoft Power BI, DAX, Power Query (M), Tableau Desktop, Microsoft Excel (Pivot Tables, Lookups)

Programming & Data Science: Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Time-Series Modeling, Scikit-learn

Data Visualization & Platforms: Power BI Service, Matplotlib, Seaborn, Git, GitHub

Experience

CSIR-Central Mechanical Engineering Research Institute (CMERI), Durgapur, India

Summer Research Intern | [Project Link](#) |

May '25-July '25

- Preprocessed and cleaned sensor telemetry data using **Python (Pandas, NumPy)**, engineering pipelines to handle missing values, sensor noise, and outliers across thousands of experimental records.
- Conducted **exploratory data analysis** (EDA) and built statistical visualizations with Matplotlib and Seaborn to evaluate feature correlations, variance, and data distributions for predictive modeling.
- Developed and benchmarked a **Bi-LSTM forecasting** model for real-time actuator force prediction, partnering with engineering teams to deliver analytical performance reports and metric dashboards.

Projects

B2B Sales Pipeline & Win-Loss Performance Analytics | [Project link](#) | *Tech stack: SQL, Power BI, DAX, Power Query*

- Analyzed 8,800+ CRM opportunities using T-SQL conditional aggregation, date analysis, and window functions to establish a 48.16% overall win rate and benchmark performance across 30 sales agents and 6 teams.
- Identified a 6.35-percentage-point gap in team win rates (45.72%–52.07%) and a 24.56-percentage-point spread among sales representatives (40.84%–65.40%), highlighting opportunities for targeted coaching and sales-process improvement.
- Built a star-schema data model and interactive 2-page Power BI dashboard using DAX measures to track team performance, product win/loss rates, and sales trends; recommended reviewing qualification practices in lower-converting teams and investigating the GTK 500's 37.50% win rate before making product or pricing decisions

SaaS Subscription Retention Analytics | [Project link](#) |

Tech stack: SQL, Power BI, DAX, Excel, PowerQuery

- Analyzed 3,069 subscription records across a 13-month period using T-SQL CTEs, DATEDIFF, and conditional aggregation to evaluate retention, churn, and subscriber tenure, identifying a 34.70% overall retention rate and 65.30% churn rate.
- Developed an interactive 2-page Power BI dashboard to track retention KPIs, signup trends, and cohort performance, identifying an upward retention trend from September 2022 to September 2023.
- Recommended retaining the existing course strategy while monitoring cohort-level retention trends, as the observed improvement suggests the current approach may be working rather than requiring a complete overhaul.

Certifications & Honours

Technical Certifications: Oracle SQL Certified | Data Analytics with Tableau (Deloitte)

Competitive Problem Solving: LeetCode SQL 50 Badge (Solved 70+ medium/hard SQL challenges covering joins, CTEs, and window functions)

Academic Honors: Qualified GATE 2026 in Computer Science | Led a team of 6 to NASA SPACE APPS HACKATHON FINAL, 2024.

Publication: "Enhancing Business Strategy through AI-Powered Cloud Security and Snowflake ERP Integration", IEEE Xplore, 2025. [DOI/Link](#)

Education

Central University of Jharkhand - Ranchi, India

Aug 2022 – May 2027

Integrated BTech MTech in Computer Science and Engineering with specialization in Data Science

CGPA- 9.22/10
