

ANSHUMAN SAMANTA

Durgapur, India | +91 7047547258 | itisanshu@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Data Analyst skilled in T-SQL, Power BI modeling, and Python (Pandas/NumPy). Experienced in developing end-to-end analytics pipelines, relational schemas, and executive dashboards tracking sales velocity and customer churn.

Technical Skills

Databases & Core Analytics: SQL (T-SQL, Oracle SQL, PostgreSQL), Relational Database Management (RDBMS), Data Modeling, Data Normalization

BI & Reporting Tools: Microsoft Power BI, DAX, Power Query (M), Tableau Desktop, Microsoft Excel (Pivot Tables, Lookups)

Programming & Data Science: Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Time-Series Modeling, Scikit-learn

Data Visualization & Platforms: Power BI Service, Matplotlib, Seaborn, Git, GitHub

Experience

CSIR-Central Mechanical Engineering Research Institute (CMERI)

May 2025-July 2025

Summer Research Intern | [Project Link](#) |

Durgapur, India

- Preprocessed and cleaned sensor telemetry data using **Python (Pandas, NumPy)**, engineering pipelines to handle missing values, sensor noise, and outliers across thousands of experimental records.
- Conducted **exploratory data analysis** (EDA) and built statistical visualizations with Matplotlib and Seaborn to evaluate feature correlations, variance, and data distributions for predictive modeling.
- Developed and benchmarked a **Bi-LSTM forecasting** model for real-time actuator force prediction, partnering with engineering teams to deliver analytical performance reports and metric dashboards.

Projects

B2B Sales Pipeline & Win-Loss Performance Analytics | [Project link](#) | Tech stack: SQL, Power BI, DAX, Excel, PowerQuery

- Engineered analytical T-SQL queries using conditional aggregation (COUNT/CASE), date partitioning, and window functions across 8,800+ CRM records to evaluate a baseline **48.16% company-wide win rate**.
- Benchmarked 30 sales agents across 6 management teams, **uncovering a 6.35% managerial win-rate variance** (45.72% to 52.07%) and a 24.56% rep spread (40.84% to 65.40%) to identify lead qualification bottlenecks.
- Designed a star-schema data model** and an interactive 2-page Power BI dashboard utilizing DAX measures (CALCULATE, ALL, DIVIDE) and custom sort keys (YYYYMM) to track quarterly velocity and product-level win/loss rates.

SaaS Subscription Retention Analytics | [Project link](#) |

Tech stack: SQL, Power BI, DAX, Excel, PowerQuery

- Architected an end-to-end customer retention framework analyzing 3,000+ subscription records across a 13-month cohort window (Sep 2022 – Sep 2023) to model churn behavior and subscriber lifecycles.
- Engineered analytical T-SQL queries using CTEs, DATEDIFF, and conditional aggregation to identify a **34.70% baseline** retention rate, a **65.30% churn rate**, and 1,226 loyal subscribers active for more than 150 days.
- Developed an interactive 2-page Power BI dashboard **visualizing monthly cohort maturation curves**, churn velocity, and repeat-subscriber funnels to drive targeted win-back campaigns.

Certifications & Honours

Technical Certifications: Oracle SQL Certified | Data Analytics with Tableau (Deloitte)

Competitive Problem Solving: LeetCode SQL 50 Badge (Solved 70+ medium/hard SQL challenges covering joins, CTEs, and window functions)

Academic Honors: Qualified GATE 2026 in Computer Science | Led a team of 6 to NASA SPACE APPS HACKATHON FINAL, 2024.

Publication: "Enhancing Business Strategy through AI-Powered Cloud Security and Snowflake ERP Integration", IEEE Xplore, 2025.

Education

Central University of Jharkhand - Ranchi, India

Aug 2022 – May 2027

Integrated BTech MTech in Computer Science and Engineering with specialization in Data Science

9.22/10 CGPA
